Your doctor ordered the PreTRM® Test

What to expect next:

1. **SCHEDULE YOUR APPOINTMENT.**
   Sera Prognostics will contact you via phone/text within a few business days with information on how to schedule your blood draw appointment.

2. **COMPLETE YOUR ONE-TIME BLOOD DRAW.**
   The blood sample must be taken during a certain window for accuracy. Our team will remind you so you don’t miss it.

3. **REVIEW THE RESULTS WITH YOUR DOCTOR.**
   Your doctor will talk through your results. Your doctor will receive the results in an average of 7 business days from the time the lab receives your sample.

**Why get PreTRM?**

**Preterm birth** occurs when a baby is born earlier than 37 weeks. Babies born earlier generally have more severe complications than those born closer to term.

**The PreTRM Test** is a single blood draw that can indicate if you are at an elevated risk of delivering too early. The results will be sent to your doctor to provide information on your individual risk for premature delivery, so you can work together to adjust your treatment plans accordingly.

If you have questions, contact us at (801) 990-6600

---

**Blood draw between 18 0/7 weeks of gestation through 20 6/7 weeks of gestation (126-146 days)**
Committed to affordability

Most patients pay less than $100 in out-of-pocket costs for the PreTRM® Test*. We believe cost should not be a barrier to information that can help you deliver a healthy baby.

With or without insurance, we are ready to help.
